

## **OMBEZI BASIN NATIONAL PRESERVE - VISITOR'S GUIDE**

Welcome all to our humble resort in the coastal Namib Desert of Namibia. It's currently the rainy season; please be on the lookout for wildlife and sudden changes in water levels while out camping or hiking in the scenic valleys and dunes near the resort!

Our attractions include a guided safari tour, especially popular during the flamingo migration season. Our locally-based tour teams are happy to show you around the busy riverfront and dramatic rock features of our preserve.

History buffs will enjoy spending time in Fort Ombezi, a restored German fort that held a crucial position in the region, guarding the mouth of the river leading to the mines of Kolmanskop.

In late 2019, an international team of engineers was contracted to assess and preserve historic mine structures within walking distance from the resort. We're proud to announce that 2020 is going to be an exciting year - join us as we open "Expedition Kolmanskop"; Namibia's first roller coaster! Experience the thrill of traveling in a runaway mine train as you race through the scenic canyons and towering rock spires of Ombezi Basin! Be sure to read about the history of the mines as you wait in line!\*

\*Note: Please do not cross any marked off areas. Other regions of the mine are under active restoration and may be dangerous at this time.
